Summary

Experienced and results-driven back-end Engineer with over +7 years of hands-on experience in development, implementing, and optimizing robust back-end solutions. Proven expertise in building scalable and high-performance systems to support complex business operations. Demonstrated success in implementing RESTful APIs, optimizing database performance, and resolving critical technical issues. Seeking to leverage my skills in back-end development and passion for innovation in a challenging and dynamic work environment.

Work Experience

Software developer

Dec 2020 - Apr 2025

GreenHonchos Solutions Pvt. Ltd

- Proven track record of successfully managing end-to-end eCommerce operations, from platform development to customer acquisition and retention strategies.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Developed REST API and integrate Third Party APIs, inventory management with PHP, Laravel and NodeJs.
- Managed efficient MongoDB And MySql queries for high performance.
- Developed a complex web application that handled 5000, 10000 concurrent users with minimal downtime.
- Conducted code reviews and mentored junior developers to improve code quality and ensure adherence to best practices.
- Implemented a microservices architecture that improved system modularity and reduced dependencies between components.
- Developed API for Bulk insert or Update operation for product catalogues using Excel Sheet on NodeJs.

Back-end Engineer

Oct 2018 - Nov 2020

Cyntra Labs Pvt. Ltd.

- Innovative and results-oriented Software Developer with 2+ years of experience specializing in product-centric software development.
- Adept at collaborating with cross-functional teams to transform product visions into scalable and high-performance software solutions.
- Managed efficient MongoDB queries for high performance.
- Developed custom services to manage application state and communicate with back-end APIs.
- Developed RESTful APIs that allowed for secure and efficient data transfer between the front-end and back-end systems.
- Troubleshoot and tested software and debugged to clean up code and improve efficiency.

Software developer

Aug 2017 - Jul 2018

Versatylo Interactive Pvt. Ltd.

- Build and ship clean, performant, scalable, secure, efficient, testable reusable PHP, and quality software that exceeds customer expectations.

Software developer

Dec 2016 - Aug 2017

Aone Royal International Pvt. Ltd.

- Having over 10 Month of experience in Wordpress Opencart & PHP Developer.

Projects

Inorbit Online India E-commerce Project

- Inorbit Online is a hyperlocal eCommerce platform by Inorbit Malls (Raheja Group), enabling digital storefronts for 4 malls.
- The platform allowed customers to shop online from mall stores with same-day delivery, boosting brand visibility and driving in-mall footfall through seamless post-purchase experiences similar to Swiggy/Zomato but for retail.
- Technologies: Node.js, Express.js, Laravel, MongoDB, Git, CI/CD

- Payment Gateway: CCAvenue

KartmaX - eCommerce Tech Platform

- KartmaX is an enterprise-grade, headless eCommerce platform built to empower Indian Direct-to-Consumer (D2C) brands.
- Designed for scalability and flexibility, the platform enables seamless omnichannel commerce with fast performance, API-first architecture, and robust integrations.
- It provides businesses with advanced search, secure transactions, and automation-driven order management.

Metro Shoes India E-commerce Project

- Metro is a highly acclaimed e-commerce website for online shopping and direct interaction with the customer.
- Build server-side applications using server-side languages in PHP and NodeJS and Laravel framework.
- I created a web API for bulk catalogue operations on an Excel sheet to upload catalogue data from the dashboard.

Mochi Shoes India

- Mochi Shoes India is an e-commerce project that also offers an e-commerce shopping site for online customers.
- We have used PHP and Node.js on the backend to handle complex logic and integrate with multiple databases, third-party APIs, and external services.
- As a back-end developer, my team and I design and optimize database schemas for efficient data storage.

Walkwayshoes Shoes India

- Walkwayshoes Shoes India is an e-commerce project that also offers an e-commerce shopping site for online customers.
- We have used PHP and Node.js on the backend to handle complex logic and integrate with multiple databases, third-party APIs, and external services.
- As a back-end developer, my team and I design and optimize database schemas for efficient data storage.

Cravrr Application

- Built a tool to managing billing, inventory, Online dukaan and CRM and loyalty.
- Cravrr POS is a point-of-sale (POS) system designed for businesses, particularly in the retail sectors.
- Product is built on Laravel and ExpressJs Framework on backend side and ReactJs on frontEnd.
- As a backend engineer, I created API for android application on NodeJs and also for web dashboard for customer relationship and third-party integration.

Education

Bachelor of Technology

Start Date - 2014

DVSIET College, Meerut

Skills

Programming Languages

PHP | JavaScript | Node.Js

Frameworks and Tools

Laravel | MySQL | SQL | MongoDB | Git | Express.Js | Web Services | Asana | Jira | AWS | Kafka

Achievements

What are you most proud of?

- Certificate of Appreciation from GreenHonchos for hard work and contribution in product.
- Certificate for participation in cricket team for GreenHonchos Team to win finale.
